INTERESTS

- ◊ Data Science ◊ Deep Learning ◊ Natural Language Processing ◊ Natural Language Understanding
- ◊ Explainable AI ◊ LLM – based Evaluation

EDUCATION

University of Florida

Ph.D. in Computer Science, Advisor: Prof. Bonnie Dorr
Department of Computer and Information Science and Engineering

Gainesville, Florida

2022-Present

University of Moratuwa

Honours Degree of Bachelor of Science in Engineering
Specialisation: Electronic and Telecommunication Engineering
Dean's Honour List in Semester 1, 2, 6, 7 and 8.

Moratuwa, Sri Lanka

2015-2019

DeepLearning.ai

Neural Networks and Deep Learning

Coursera

2019

PUBLICATIONS

Peer-reviewed Publications

WORK HISTORY

Aug 2022 Present	Graduate Research Assistant (Research grant: DARPA INCAS) <i>The Natural Language Research & Culture (NLP&C) Laboratory, CISE, University of Florida</i> Researches ambiguity detection on Natural Language Inference (NLI), targeted entity extraction for sentiment analysis and stance detection, and developing explainable systems using AMR, graph neural networks (GNN), sentence embeddings, and dependency representations.
Aug 2022 Present	Graduate Teaching Assistant <i>CAP4641, CAI6309 - Natural Language Processing, CISE, University of Florida</i> Assists undergraduate students in course projects. Mentors graduate student teams in conducting NLP research and guides them in designing experimental pipelines for their projects.
Sep 2021	Cognius.ai - AI Research Engineer
Jun 2022	Developed few-shot intent classification models for conversational AI, Trained language models with minimal examples, and generated synthetic data for efficient intent classification.
Feb 2020	Graduate Research Assistant (Research grant: AHEAD)
Sep 2021	<i>Natural Language Processing Center (NLPC), CSE, University of Moratuwa</i> Conducted research on enhancing Sinhala-English translation models through post-processing techniques by identifying and addressing frequent error types in the translation process.
Jun 2018	Forestpin (Pvt.) Ltd. - Machine Learning Research Intern
Dec 2018	Developed sales prediction models to forecast sales trends and implemented an inventory prediction algorithm for optimized management in supermarket outlets.

SELECTED PROJECTS

BLADE: Better Language Answers through Dialogue and Explanations (2025)

Conducted research study on the impact of using a knowledge-grounded conversational assistant on student performance in an undergraduate-level course.

Stack: RAG-based conversation assitant, Python

LLMs as Commonsense Knowledge generators for Natural Language Inference (NLI) (2025)

Evaluated LLMs as commonsense knowledge sources by generating axioms for NLI predictions on SNLI and ANLI datasets. Implemented an LLM-as-judge framework to scale evaluation and assess axiom factuality.

Stack: Llama-3.1-70B-Instruct, Clause-3.5-Sonnet, Python

Fact Verification via AMR with Explainability (2024)

Developed an explainable fact verification pipeline using AMR graphs to assess meaning containment between claim and evidence. Combined AMR evaluation metrics with cosine similarity and provided post-hoc graph alignments for prediction interpretability.

Stack: Python, IBM transitioned-based AMR parser, Smatch, S^2 match, SentenceBERT

Targeted Sentiment Analysis through Convolutional Networks (2023)

Developed a GCN-based entity recognition system combining dependency parsing, rule-based features, and token embeddings for node classification. Integrated the model into a targeted sentiment analysis pipeline and evaluated on SemEval 2014 ABSA dataset.

Stack: Python, SpaCy, Dependency trees, Graph Convolutional Networks, DistilBERT

Automatic Error Visualizing and Analyzing Tool (2021)

Developed a tool for the classification, visualization, and frequency analysis of translation errors in Sinhala-English Machine Translation systems. The tool identifies frequent translation errors to enhance system performance.

Stack : Python, NLTK, Jupyter Notebook.

Improving Sinhala - English Machine Translation quality using Automatic Post Editing (APE) Techniques (2020)

Research on current APE techniques and implementation of a suitable APE system to improve Sinhala - English Machine Translation quality

Stack : OpenNMT-py, OpenNMT-tf, Pytorch, LSTM, Transformer-Based Models.

Customer recommender solution for banking domain (2018)

A customer recommender solution with a useful feature that enables the bank to describe customer behaviors and generate insight through them was designed and implemented using the customer transaction and demographic data available in a given bank database.

Stack : Python, PySpark, XGBoost, AWS virtual servers.

OPEN-SOURCE CONTRIBUTIONS

Project Aya by Cohere for AI

Contributed to help developing instruction-style datasets for Sinhala, a low-resourced language, as part of their initiative to create a massively multilingual LLM supporting under-represented languages.

Fine-tuning BERT and DistilBERT models in HuggingFace

Fine-tuned two BERT-base-uncased models for analyzing political discourse and Abstract Meaning Representation (AMR) sequence processing

SKILLSET

Programming Languages: Python | R | C++

Softwares : Matlab | Weka

Machine Learning Frameworks: Pytorch | HuggingFace | Opennmt-py

NLP Tools: Spacy | NLTK | XGBoost | Transformers

Technical Skills : Data Visualization, Preprocessing, Analysis and Modeling, R&D, Conversational AI

Soft Skills : Collaborative Work | Problem-Solving | Self-Starter

Other : L^AT_EX | Git | CSS | Flask | AMR graphs

AWARDS & ACHIEVEMENTS

2023: CISE Scholarship Award, Gartner Group Graduate Fellowship for excellence in publication record, University of Florida

2015-2019: Dean's Honour List for outstanding academic achievements in Semester 1, 2, 6, 7 and 8.

2015-2019: Mahapola merit scholarship for outstanding performance in GCE Advanced Level by the government of Sri Lanka.

2018: India's first Bank-led Datathon organized by Yes Bank, India - 1st runner up and Best Student team award

2018: Hackstat 2018, a Datathon organized by the Stat Circle of University of Colombo - 1st Place

2014: Sri Lankan Physics Olympiad Competition - Merit Award
